

## Instructor Biography

Joey Schwab owns and operates two plumbing companies in Sarasota, Florida. S&S Plumbing, Inc. and Bob Rizi Plumbing. Joey is a second generation Master Plumber, licensed in the state of Florida.

Joey is a graduate of the University of Florida and holds a Bachelor of Science in Business Administration. Upon graduation he started in the Plumbing trade with his Father's company and has continued to find innovative ways to remain a leader in the Sarasota area.

Taking a proactive approach to promote conservation, Joey partnered with EPA WaterSense. Becoming a licensed GreenPlumber and certified instructor for GreenPlumbers® is yet another step in the direction of educating customers and colleagues to create a more sustainable environment.

## The Future of Plumbing is Green

### **Introducing the Future of Plumbing....**

GreenPlumbers® is an innovative, national training and accreditation program that assists plumbers in understanding their role in the environment and public health. The organization's goal is to train and deploy a green army of thousands of plumbers to promote the benefit of water conservation and the reduction of GHG emissions. How can we expect the homeowners and business people of this country to be serious and knowledgeable about water and energy conservation unless the plumbing professionals that provide these services are equally as serious?

### **Why Should You Attend?**

New business opportunities are available to plumbers as the United States enters a new era of conservation and sustainability. As consumers become more educated on conservation, they will demand that their plumbing professionals be able to address their wants and needs. Being educated and trained in green plumbing will position your company as an expert on water-saving and energy-efficient technologies. Attaining the skill and knowledge levels associated with green plumbing will enhance your public image and market you as the expert on new products and technologies. By learning water, energy, and money saving solutions, you will generate increased business with new and existing customers.

### **What Will I Learn?**

This 8 hour accredited GreenPlumbers® course entitled "Water Efficient Technology" will include instruction on

- Recycled Water
- Rain Water
- Graywater
- Septic Tanks/Wastewater Treatment Systems
- Environmental/Public Health/Safety Regulations

## The Future of Plumbing is Green

### **What Will I Leave With?**

You will leave this seminar armed with knowledge and forms that you can implement into your business. Individuals who successfully complete this workshop will receive a certificate of accreditation and be listed on the GreenPlumbers® Web site as an Accredited GreenPlumber for Water Efficient Technology.

**Note:** The GreenPlumbers® training & accreditation program is an individual training program designed to increase awareness of water and energy conservation products and methods of installation. Individuals completing training are entitled to present themselves as accredited GreenPlumbers. However, completion of this course does not confer any rights to use the GreenPlumbers® trademarked logo and business model. Information regarding logo use and GreenPlumbers® licensing is available at [www.greenplumbersusa.com](http://www.greenplumbersusa.com).

### **What's Next?**

GreenPlumbers® training consists of a five-course, 32-hour accreditation in environmental and technical issues including Climate Care (8 hrs), Caring For Our Water (8 hrs), Solar Hot Water (4 hrs), Water Efficient Technology (8 hrs), and an Inspection Report Service (4 hrs). When you have completed this seminar, Water Efficient Technology you will have acquired 8 of those 32 hours. The Illinois PHCC plans to offer more GreenPlumbers® seminars in the future.
