

Instructor Biography

John Klesaris is a Master Plumber with almost 30 years experience in the trade. A contractor himself, he helps other contractors and their employees learn to operate more efficiently and profitably. His teaching style has been enjoyed by contractors from around the country, with a common sense approach to educating small business owners from many industries on topics like marketing, understanding financial statements, business systems and leadership.

He is the founding member of his local PHCC chapter, a PHCC of Massachusetts Past-President, a continuing education Plumbing Instructor, GreenPlumbers® Instructor and PHCC Leadership Conference speaker.

John is the author of the business book *All Systems Go!*, as well as several manuals and training tapes designed to help small businesses and service companies prosper. He owns a plumbing company and works as a business coach and speaker. He resides in Massachusetts with his wife Nancy and their four children.

The Future of Plumbing is Green

Introducing the Future of Plumbing....

GreenPlumbers® is an innovative, national training and accreditation program that assists plumbers in understanding their role in the environment and public health. The organization's goal is to train and deploy a green army of thousands of plumbers to promote the benefit of water conservation and the reduction of GHG emissions. How can we expect the homeowners and business people of this country to be serious and knowledgeable about water and energy conservation unless the plumbing professionals that provide these services are equally as serious?

Why Should You Attend?

New business opportunities are available to plumbers as the United States enters a new era of conservation and sustainability. As consumers become more educated on conservation, they will demand that their plumbing professionals be able to address their wants and needs. Being educated and trained in green plumbing will position your company as an expert on water-saving and energy-efficient technologies. Attaining the skill and knowledge levels associated with green plumbing will enhance your public image and market you as the expert on new products and technologies. By learning water, energy, and money saving solutions, you will generate increased business with new and existing customers.

What Will I Learn?

This 8 hour accredited GreenPlumbers® course will include comprehensive instruction on **Climate Care** including gas emissions in home and business.

Topics covered include:

- Hot water heating
- Energy consumption
- Heating appliances
- Cooling appliances

The Future of Plumbing is Green

What Will I Leave With?

You will leave this seminar armed with knowledge and forms that you can implement into your business. Individuals who successfully complete this workshop will receive a certificate of accreditation and be listed on the GreenPlumbers® Web site as an Accredited GreenPlumber for **Climate Care**. **Note:** The GreenPlumbers® training & accreditation program is an individual training program designed to increase awareness of water and energy conservation products and methods of installation. Individuals completing training are entitled to present themselves as accredited GreenPlumbers. However, completion of this course does not confer any rights to use the GreenPlumbers® trademarked logo and business model. Information regarding logo use and GreenPlumbers® licensing is available at www.greenplumbersusa.com.

What's Next?

GreenPlumbers® training consists of a five-course, 32-hour accreditation in environmental and technical issues including **Climate Care** (8 hrs), Caring For Our Water (8 hrs), Solar Hot Water (4 hrs), Water Efficient Technology (8 hrs), and an Inspection Report Service (4 hrs). When you have completed this seminar, **Climate Care** you will have acquired 8 of those 32 hours. The Illinois PHCC plans to offer more GreenPlumbers® seminars in the future.
